

RAKESH R K

Bengaluru | 8055.rakeshrk@gmail.com | [github](#) | [linkedin](#)

SUMMARY

Cybersecurity-focused B.Tech Computer Science student at PES University with strong hands-on experience in offensive security, network security, threat hunting, and secure system design. Proven ability to build stealth authentication mechanisms, covert communication channels, and SOC-style traffic analysis pipelines. Active CTF competitor and TryHackMe top performer with a deep interest in real-world security research, attack detection, and system hardening.

PROJECTS

SentinelHunt — AI-Assisted Network Threat Hunting Platform

[link](#)

- Developed a PCAP-based network analysis pipeline.
- Extracted flow-level features for threat detection.
- Simulated SOC-style traffic analysis workflows.

GhostNet — Encrypted Covert File Transfer over DNS

[link](#)

- Built a covert file transfer system using DNS tunneling.
- Implemented encrypted data transmission over DNS traffic.
- Explored protocol abuse and detection challenges.

Port Knocking Authentication System

[link](#)

- Implemented port-knocking based server authentication.
- Enforced default-deny access using firewall rules.
- Added IP logging and auto re-lock mechanisms.

3D Interactive Personal Portfolio Website

[link](#)

- Built a 3D animated portfolio using MERN stack.
- Implemented smooth UI animations with Three.js, GSAP, and Framer Motion.
- Optimized performance using lazy loading techniques.

University Campus Network Design

[link](#)

- Designed a 50+ node campus network in Cisco Packet Tracer.
- Configured DNS, DHCP, HTTPS, and SMTP services.
- Gained hands-on experience in network configuration and troubleshooting.

EDUCATION

B.Tech in Computer Science & Engineering

Oct 2023 - Oct 2027

PES University , Bengaluru

- GPA : 7.7 , Relevant Courses: Computer Networks , Network Security , Applied Cryptography

SKILLS

Cybersecurity & Networking

Penetration Testing, Network Traffic Analysis (PCAPs), Packet Sniffing, Threat Hunting, Cisco Packet Tracer, Wireshark, Scapy

Programming

Python, C, C++, JavaScript, Bash

Web & Systems

MERN Stack, Three.js, Framer Motion, GSAP, Git/GitHub, Kali Linux, knockd, netfilter-persistent

ACHIEVEMENTS & SECURITY EXPERIENCES

- Ranked in the Top 5% on TryHackMe, demonstrating strong hands-on cybersecurity skills.
- Participated in 5+ Capture The Flag (CTF) competitions; team secured ~₹9,000 in total cash prizes.
- Performed penetration testing on Colddbox (c0lddb0x) using Kali Linux tools and achieved root-level access through systematic enumeration and exploitation.
- Awarded Distinction Scholarship Certificate in 3rd semester with an SGPA of 8.58.
- Obtained Corizo Cybersecurity Certificate.
